

# Guiding Questions for Discussion

*Discuss the following questions with your fellow board members.*

1. What types of data are collected in your district?
2. What other data need to be gathered and why?
3. Have you and your fellow board members used data to make informed policy decisions about school improvement, teacher quality, student achievement and other issues? Why or why not?
4. How are the results of assessments and other measures of student achievement reported to the school board?
5. What are you learning from this data?
